

Ryder Supply Chain Solutions Fact Sheet

SUPPLY CHAIN SOLUTIONS (SCS)

Supply Chain Solutions (SCS) optimizes logistics networks to make them more responsive and able to be leveraged as a competitive advantage. Globally-recognized brands in the automotive, consumer goods, food and beverage, healthcare, oil and gas, technology, and retail industries rely on Ryder's leading-edge technologies and world-class logistics engineers to help them deliver the goods that consumers use every day.

SOLUTIONS BY INDUSTRY

Every industry faces its own unique supply chain challenges. That's where Ryder's proven expertise in key industries can help. Drawing on years of experience and standard solution sets that are scalable and repeatable across companies in the same market, Ryder can optimize a solution to the needs of any business. Ryder's SCS business supports customers principally in the U.S., Canada, Mexico, and Singapore. Ryder employs 36,100 people, manages a fleet of 240,600 commercial vehicles, and operates 319 facilities with more than 50 million square feet of warehouse space managed globally.

Automotive/Aerospace/Industrial:

- As the automotive industry's largest lead logistics provider, Ryder can help any business optimize its assembly operations, boost efficiency and lower supply chain costs.
- In the aerospace and defense industry, Ryder offers the scale, just-in-time capabilities and assembly line-side delivery solutions companies need to optimize their supply chain.
- With decades of experience, Ryder helps some of the world's leading manufacturers streamline operations, meet financial goals and boost quality.

Consumer Packaged Goods/Food & Beverage:

- With vast scale and proven leadership, Ryder helps fast-moving consumer goods companies boost performance and keep up with shifting market and retailer requirements.
- Ryder offers source-to-shelf solutions for the food and beverage industry, including contract packing and labeling, distribution and inventory management, safety, sustainability, and dedicated transportation.
- Ryder has served the world's largest food & beverage companies for more than 80 years. Today, Ryder can help businesses optimize supply chain efficiencies to drive better performance with customers and retailers.

Oil & Gas:

- The oil and gas industry relies on Ryder to take costs and risks out of transportation and logistics, enabling customers to maximize uptime, keep supplies and goods moving, and bring costs down.
- This is all supported by a proven health and safety culture driven by experienced oilfield operators and health, safety, and environmental professionals.

Retail:

- When big-name retailers need help optimizing transportation and distribution networks, they turn to Ryder, a leader in Direct-to-Store Delivery (DSD).
- Ryder provides services for various top Fortune 500® U.S. retailers, helping them to streamline global sourcing, speed products to market, reduce costs, and drive growth.

Technology/Electronics and Healthcare:

- Speed to market, retailer compliance, shipping visibility and product security are critical to success for hi-tech supply chains. That's why some of the world's leading technology manufacturers rely on Ryder to optimize complex distribution channels.
- In the challenging healthcare industry, an efficient supply chain is the differentiator in meeting rigorous standards for positive patient outcomes. Ryder provides multi-channel distribution, specialized trucks and equipment, product customization, supply chain optimization and manufacturing support for the healthcare industry.

SOLUTIONS BY CAPABILITY

Today, companies are focusing on strategic renewal, searching for creative solutions to reduce costs, raise the bar on customer service, manage risk and increase efficiency. With a high-performing supply chain, functions are executed with precision and reliability. Companies can deliver faster, work smarter, enter profitable new markets, and compete on a global scale.

INTEGRATED LOGISTICS

Supply chains are more complex than ever. Competition is intense. Consumers are demanding more. As a result, driving efficiency has become a critical priority. That's when outsourcing non-core activities like logistics makes smart business sense. It provides a unique opportunity to improve customer service, control costs and streamline operations. Ryder's Integrated Logistics solutions include:

- **Control Tower:** With Ryder's Control Tower solution, companies can dynamically plan and adjust product movement and drive efficiencies with a full range of services.
- **Network Design:** Let Ryder determine the optimal number, location and function of logistics facilities and transportation modes.
- **Origin/Destination Services:** With Ryder's purchase order management, consolidation and value-added services, Ryder can help businesses speed goods to market with the visibility and cost controls they need.
- **Inbound Manufacturing Materials Management:** This solution harnesses LEAN practices and Ryder's expertise in logistics and product flow management to keep assembly lines running smoothly. Ryder helps design and engineer a state-of-the-art inbound product flow that gives companies the flexibility to enhance or implement Just-in-Time (JIT) manufacturing.

WAREHOUSING & DISTRIBUTION

Ryder offers a comprehensive suite of distribution management services, from locating the optimal site for distribution centers, designing a layout and set up processes, equipment and visibility tools; to hiring and training staff to ensure that goods flow smoothly and inventory arrives when and where it's needed and in the exact quantity needed.

- **Cross Docking:** Keep products flowing with a cross-docking solution that moves them directly from receiving to shipping areas to reduce distribution costs and delivery times.
- **Reverse Logistics:** Recover asset value from returns and repairs with a Reverse Logistics solution that integrates into any supply chain strategy to streamline returns processing.
- **Value-added Services:** With Ryder's value-added services, businesses can customize products and packages closer to the point of delivery and respond to fast-changing market and customer requirements.
- **Distribution Management:** From staff hiring and training to inventory management, packaging, value-added services, reverse logistics and co-located warehouse facilities, Ryder offers a suite of services to support any distribution management needs.

TRANSPORTATION

Whether it's mapping routes, managing freight bills or optimizing loads, Ryder's Transportation Management solutions deliver the improved visibility, control and speed to market any businesses' needs.

- **Transportation Management:** Annually, Ryder purchases and/or executes \$5.2 billion in freight moves on behalf of its customers and also manages shipments through four global control towers and a network of more than 3,100 carriers. From planning, procurement and execution to management of your transportation network, Ryder can help reduce transportation costs and improve service levels.
- **Cross Border Services:** Ryder helps customers streamline the flow of products from manufacturing and distribution facilities in Mexico and Canada. Ryder assists with cross border flows both northbound and southbound to destinations across North America. Ryder handles 17,900 cross-border freight movements a month between the U.S., Canada, and Mexico on behalf of North American manufacturers in various industries. In Mexico, Ryder contracts with more than 150 Mexican carriers.
- **Freight Brokerage:** With less exposure to freight loss or damage, dependable on-time pickup and delivery, express rate quotes and access to more than 10,000 for-hire carriers and a nationwide network of quality Ryder fleets, businesses can turn freight management over to Ryder and focus on what they do best: run their business.
